

Displaying Today in the Park

Today in the Park is a web page that uses modern JavaScript to sequentially display “slides” with today’s park information for visitors.

Some TVs (including the one at JTVC) have older browsers that can’t properly display modern code. The Amazon Firestick is an inexpensive way to put a modern web browser on any TV with an HDMI port. The Firestick on the JTVC is on HDMI port 1.

Starting Up

- 1) **Turn ON the TV** using the power button on the Firestick remote (has brightly colored sleeve). That should turn on the TV AND open up on the Today slide page.
- 2) **If you don’t see the Today page:**
 - a) On the TV remote (not Firestick remote) press home and make sure the TV is set to HDMI 1 source.
 - b) If the TV is not showing a web browser, press Home on the Firestick remote, and then scroll over to the square labeled “Internet”, and select it.
 - c) If you do see a web browser, but not the Today page, scroll over to the Menu icon (small checkerboard) and choose the rotate.php page from the bookmarks.
- 3) **To hide the menu bar**, click the menu button (3 bars) on the remote twice. It will come back but that’s the best it can do.
- 4) **To localize settings** to YOUR TV, click on the Time on the left end of the title bar. It will open a local screen where you can choose the title, which of the pages to show, and the rotation speed. Click Submit. Then you have to use Back to get back to the Today page.

Shutting Down

Turn OFF the TV by pressing the power button the Firestick remote.
